9112647721

Hi Sumit sir,

Catking student here, had some ideas on product improvement for Catking, would love to be able to implement few of these as **a product manager intern/contractual for 2 months** before I join my IIM ABC.

Hopefully you will like some of these ideas.

Had received call from your team members, asking for testimonials+feedback, thus felt that you might be open to new ideas :) Hence decided to share. These have been going through my mind for quite sometime.

List of feature ideas –

- Clearer product pitch for newbies – emphasizing moats better
- Freemium Strategy for increasing registrations
- Social media for transcripts
- WAT practice group daily
- AWT guide
- Google form for data collection instead of whatsapp
- WAT past year questions display as a whole feature in itself
- Add more transcripts (using thoemi dataset Ill send)
- Ability to buy more interviews
- PDF file discussed in class shareable on the catkingn dashboard itself.
- Bookmarks in pdf

Full descriptions –

Clearer product pitch for newbies – emphasizing moats better –

Recorded Classes	
Interview Skill Building	Video Series By IIMs, SPJIMR, FMS Alumni
WAT Strategies	WAT Approach through Videos, Most expected WAT Topics and Samples WATs
Mentorship	
Personal Interview	1 Mock Personal Interview with IIM Mentors, Personalized feedback and profile review
Feedback	From alumni of IIMs A, B, C, SPJIMR, FMS, NMIMS
Mock Group Discussion	1 Mock Group Discussion with Specialised Mentors with Personalised Feedback
Additional	
WAT PI Dockets	Student Experiences for the Top 50 Colleges
Functional Dossiers	Get your Mini MBA Done with Concepts of all Streams
Interview Questions Repository	Most expected Questions for interview preparation
Sample SOPs	200+ Sample SOPs for IIMs, IITs, SPJIMR, NMIMS and other colleges
Alumni Connect Sessions	for all Colleges for the Call Getters; Converts of Top 50 Colleges
Special Offerings	
Updates	WhatsApp Group for Important Notifications
Validity	

Here is what the catking gd pi buying website looks like

What I believe are the moats of Catking –

Classes start just after CAT result, as opposed to TIME and IMS who start after calls are out. This can be emphasized, as students are looking for this information

Dockets are really good quality, I believe 1-2 dockets can be shared as a freemium strategy to convince students that the material is good.

Lowest cost in market

One of the best digital products, I have taken time and ims also, yet they are mostly offline centric.

Additionally -

“Student experiences” is very generic for someone reading first time, Say “300+ interview transcripts”

Freemium Strategy for increasing registrations –

What if, we let students log into a dummy dashboard, where few dockets, dossiers, pdf etc would be visible.

Benefit to students - This way they would be able to understand the product offerings better

Benefit to you – You would be able to get their mail ids, which can be used for marketing purposes.

IMS already uses this strategy with ims 0 fees batch

Social media for transcripts –

Right now, transcripts are only being collected in the end I believe, meanwhile students require transcripts throughout their interview season, and students are very keen to know what kind of interviews are going on for their peers.

So we need to design a mechanism, where students can post their interview experiences in the middle of the season too.

This can furthermore be made social media like, with ability to comment, so that people feel excited sharing their transcripts (one demerit tho, im not sure about comment moderation)

WAT Practice group strategy –

I have written 50+ WATs this season. I used to write one daily.

However, that ecosystem was missing in all coachings (I think btribe started it tho), so I created it myself.

Firstly, we can offer a prompt to allow students to get their WATs checked by a chatbot.

Secondly, I believe that AI checking is not enough, hence we need to have human checking too.
(don't worry we wont need to hire someone lol)

I suggest – Peer based WAT review –

This is how I was doing it with few strangers.

Basically, we will release a past year topic as “WAT topic of the day”

Then, students would be able to submit their WATs as google docs.

Then, students would be able to review each others WATs.

That way, students get exposure to different ideas of writing, which they didn’t get themselves.

AWT guide –

There is lack of guidance for AWT.

I have made one guide, will send if you want, that can be added.

Furthermore, practice topics can also be added.

Google form for data collection instead of whatsapp –

Currently, students are required to give their profile details on whatsapp, for each college group they join.

This creates repeated spam messages, which leads to (for myself and for others too I assume) blocking of notifications for the whatsapp group.

A simple solution can be to take this data once and for all using google forms. And then you already have the data for call getters via your website.

If it is really important to show students the dataset, it can be shared via google sheets on read only mode too.

WAT past year questions display as a whole feature in itself –

Yes, there is a WAT booklet with topic types and all.

However, students are less interested in “topic” based WAT preparation, and more into college specific WAT preparation.

Therefore, we can add a new booklet, called past year WAT topics separated college wise.

This data is already available in the dockets, however it is very interleaved with the transcripts.

When I sit down to prep for WAT, I often have to sift through transcripts to find the WAT topics. That problem would be solved easily.

Add more transcripts (using thoemi dataset Ill send) –

THEOMI is a free coaching, it’s a community rather.

There the students have already given so many interview experiences on telegram.

I have scrapped their dataset.

I could send if you want.

It's a free coaching where people are willingly sharing their experiences, a crowdsourced dataset basically, therefore I don't believe there should be any privacy or legal issue.

Ability to buy more interviews –

One of the biggest demerits of Catking – only 1 mock interview.

Most students, they are not looking for all the features, they are comparing coachings via the number of mock interviews they offer. Seeing only 1 mock pi, its almost guaranteed that they are looking for other coachings alongside catking.

To solve this, you could have a token based model – where a student can buy more interview slots by giving some money (eg – 400 rupees per mock PI)

And this can be emphasized, as I don't think any other coaching has this model yet.

(Im not sure about the resource availability tho)

PDF file discussed in class shareable on the catking dashboard itself –

Half the times, after the class is over, the pdf goes missing, or takes a week to reach us.

This can be solved by explicitly creating a pdf option next to the meeting, for the admins.

Not sure, but I think this problem was already solved right ? In the recent few months.

Bookmarks –

Ability to bookmark a page on the transcript docket booklet. Useful for revising, when we have to again go through.
