

SITUATION ANALYSIS

OVERVIEW & INSIGHTS

In today's hyper-connected world, couples can communicate instantly through text and video — yet **sensory connection remains absent**.

While scent is one of the strongest triggers of memory and emotional intimacy, luxury fragrance is **still experienced individually**. We identified an opportunity to redefine fragrance as a **shared emotional ritual**.

MARKET GAPS

1. *Fragrance Is Individually Experienced*

Perfume exists around one person, not shared across distance

2. *Sensory Presence Is Missing in Digital Connection*

Texts and calls connect minds and voices, but lack physical cues like scent that reinforce closeness.

3. *Scent Is Untapped as a Connection Medium*

No product today transforms perfume into a real-time emotional presence

WHY?

- 60 million people experience long-distance phases
- Experience-driven luxury is growing at 2× traditional luxury
- Global fragrance is a \$60B+ market evolving toward emotional wellness
 - No brand owns “emotional connection through scent.”

L'Oréal Luxe has the opportunity to create an entirely new luxury category where fragrance becomes **a living emotional bridge** — transforming perfume into a **shared, real-time experience of presence**.

OUR SOLUTION

MECHANISM

1 — Pair & Sync

Connect both devices securely through the mobile app for real-time emotional linking.

2 — Proximity Detection

IoT sensors using AI detect when a partner comes close to their device.

3 — Sensory Activation

Fragrance is gently released with a soft ambient glow.

4 — Twin Device Sync

The paired device activates instantly — anywhere in the world.

5 — Shared Experience

Both partners feel the same scent + light moment together.

SCENTLINK A TIMELESS CONNECTION

- Real-time synced fragrance & ambient light between paired devices
- Proximity + touch interactions create intentional emotional moments
- Secure app-linked system turns scent into a shared emotional signal

INCLUSIVITY

Emotion Over Gender

ScentLink is gender-agnostic — built around relationships and connection, not “for him” or “for her.”

Sensory Accessibility

Luxury experience, naturally inclusive for the visually impaired.

SUSTAINABILITY

Eternal Hardware

Long-life decorative timepiece with a clock made from recycled PCR glass; built to last years.

Refillable Ecosystem

Reusable device with fully recyclable aluminum scent refills

We're not selling perfume. We're building emotional presence through scent.

SCALABILITY

~60 million couples world-wide in long distance relationships.

~4 Mil.
